

## UPDATES ON JO'S SUPPORTED FAMILY

Home utensils, school uniforms, school bags, shoes for the children attending school, food stuffs have been bought. The father has constructed a drying rack, and another rack inside to work as cupboard to keep the home utensils in a hygienic way. See the changes that have taken place in a short time

Starting with 4<sup>th</sup> March, they now have 3 meals a day. See above items that were bought for the family. They have where to cook from, serve from, what to use to fetch water and where to bathe from. They have soap, jerry, tooth paste and tooth brushes. Find below the steps so far taken to improve hygiene at home

They have where to keep their things in an orderly way unlike before when they used to throw everything on the floor. When they wash utensils, they put them on the drying rack to dry before they use them. They now look a bit clean. The mother sweeps the house and compound every day. The mother can now laugh unlike before when she was always unhappy. When asked, she said she now have

reasons to laugh because she is in position to provide something to children when in need.

The children look smart in uniform, have school bags and are putting on shoes. They are now E.Gs

Fellow children are welcoming them and willing to mix with them. They were given the front seat because, they begun late and need much attention from the teacher. I gave them the front seat so that I am able to guide them since they joined us late when we had covered a lot." Said teacher provia".

The passport photos of the father were taken to complete the process of getting them a temporally citizenship. We are experiencing a long drought and hesitant to hire land and fail to plant seeds. When we get rain, we will hire land and buy seeds for the family.

A BIG THANK YOU FOR THE SUPPORT

Florence Tumuheirwe
